

PPL 1.23 has been released

kornalius, Friday 16 March 2007 - 15:35:05

Pocket programming Language version 1.23 has just been released.

Here is the change log:

- Fixed ListToStr() function bug introduced in 1.22.
- New Edit_Length, Button_Length, Label_Length, Combobox_Length and Listbox_Length functions in swapi.ppl.
- Fixed functions Scrollbox_GetRange and Scrollbox_Get for the PocketPC in Swapi.ppl.
- Added "Auto Hide" option on Procedure Form in PIDE.
- Fixed PIDE Cut, Copy and Paste menu items.
- Added support for unicode strings in g_loadfont, g_drawtext, g_drawtextex, g_cachetext, g_textwidth
- Fixed PIDE to delete .ppc file for forms and .ppl files every time.
- Fixed Linker to remove unused procs/funcs like before.
- Fixed linker in debug mode bug.
